FOAMCYCLE

Foam Cycle is a patented foam collection, densifying and repurposing system.

Foam Cycle is a unique recycling company pioneering a closed loop recycling system to help solve the "foam problem".

Foam packaging and food service foam (aka Styrofoam) are one of the most plentiful, yet least recycled plastics in existence today.

The Foam Cycle system processes expanded polystyrene foam into dense ingots, which will be shipped to processing facilities for various uses.

The NEKWMD's mission is to provide environmentally-sound waste management services at the least cost to our citizens.

FOAM RECYCLING

IN THE NORTHEAST KINGDOM WASTE MANAGEMENT DISTRICT

BEGINNING
AUGUST 2022
AT THE LYNDONVILLE RECYCLING CENTER!

NEKWMD
NORTHEAST KINGDOM WASTE MANAGEMENT DISTRICT

NEKWMD'S Expanded Polystyrene Recycling Program

The Northeast Kingdom Waste Management District is excited to offer foam recycling to NEKWMD residents at the Lyndonville Recycling Center starting August 6, 2022.

This new program is available only at the Lyndonville Recycling Center. This is a 6-month pilot project in collaboration with FoamCycle.

Please help the NEKWMD have a successful program by reviewing what is and is not accepted before recycling foam with the NEKWMD.

This program is available to NEKWMD residents and businesses only. Visit www.nekwmd.org for more information.
