HELP US PLAN FOR THE FUTURE!

PARTICIPATE IN THE COMMUNITY PLANNING SURVEY

In 2019 Corinth voters adopted a Town Plan which charges the Planning Commission (PC) with the responsibility of developing land use regulations that will help preserve the historic rural, residential quality of our town, maximize open space, protect forest habitat, and manage and control future commercial and industrial development. Any regulations would apply only to future development - existing structures and uses would not be affected.

The PC wants to know what land development issues are most important to the people in this town. The PC decided the best way to do that was with a community survey. The enclosed survey is focused on the issues that the PC believes are important, but you may have other concerns about development in Corinth. Please use the blank side of the survey for your comments. If you need more copies of the survey because there are additional people at your address who want to participate, copies of the survey are available at the Town Clerk’s office at the Town Hall.

After the survey results are in there will be community meetings to discuss the results and where we as a Town go from here. Your input in this process is important.
2023 Community Survey

Please rate each of the following issues on the following scale: 1- not important at all; 2 – very little importance; 3 – no opinion; 4- somewhat important; 5- very important. Please circle your choices.

1. Protecting ridge tops and high elevations from development
   1 2 3 4 5

2. Protecting the night sky by limiting types of outdoor lighting
   1 2 3 4 5

3. Limiting the location of commercial/ industrial development
   1 2 3 4 5

4. Limiting residential development to certain areas ........... 1 2 3 4 5

5. Preserving agricultural land............................................. 1 2 3 4 5

6. Preserving wildlife corridors, forest blocks, wetlands....... 1 2 3 4 5
